

## PLANTING SUGAR SNAP PEAS

The BC Garden Club has used Wyatt-Quarles Super Sugar Snap pea seeds in the past. Bags of seed can be purchased at Country Farm and Home, Pittsboro.

Plant anytime between Christmas and early January.

Seeds should be overplanted. Plant 2 inches deep, planting about 20 seeds in an area the size of an open hand print. You can closely space the planted areas. Plant where the pea vines will have good supports.

Snap peas should be ready in April and harvested before other late Spring/early Summer crops need to be planted.
